

# Artist Website Assignment

You are tasked with designing and developing the official website for your favorite band or music artist (or DJ). You are using HTML / CSS to edit a template from the [startup framework](#) built on [bootstrap](#) ([framework](#)). There is no page limit, but you are required to create a minimum of **three** pages.

## SITE MAP

- Home (index.html)
- Side page (copy of index.html)
- Sample Pages
  - o Home
  - o About
  - o Music / Discography
  - o Contact / Booking

## ASSETS

- CSS folder
  - o Edit 'static/css/style.css'
- Images folder
  - o Add photos and images to 'startup/common-files/img/'
- JS folder (no need to touch, unless you'd like to edit)
  - o Add photos and images to 'startup/common-files/js/'

## ADDITIONAL INFORMATION

- Don't sweat MAMP – you can edit locally through Sublime Text
- Bands typically have social media and links to their songs / albums
- When you edit CSS, keep an eye out for [responsive](#) changes to your website

## DUE DATE

- Monday, June 2nd @ Noon
- Share any struggles / tips with your partner during Monday morning
- For the brave... we'll let you present your website to the class!
